What is a 'normal' positive learning environment?

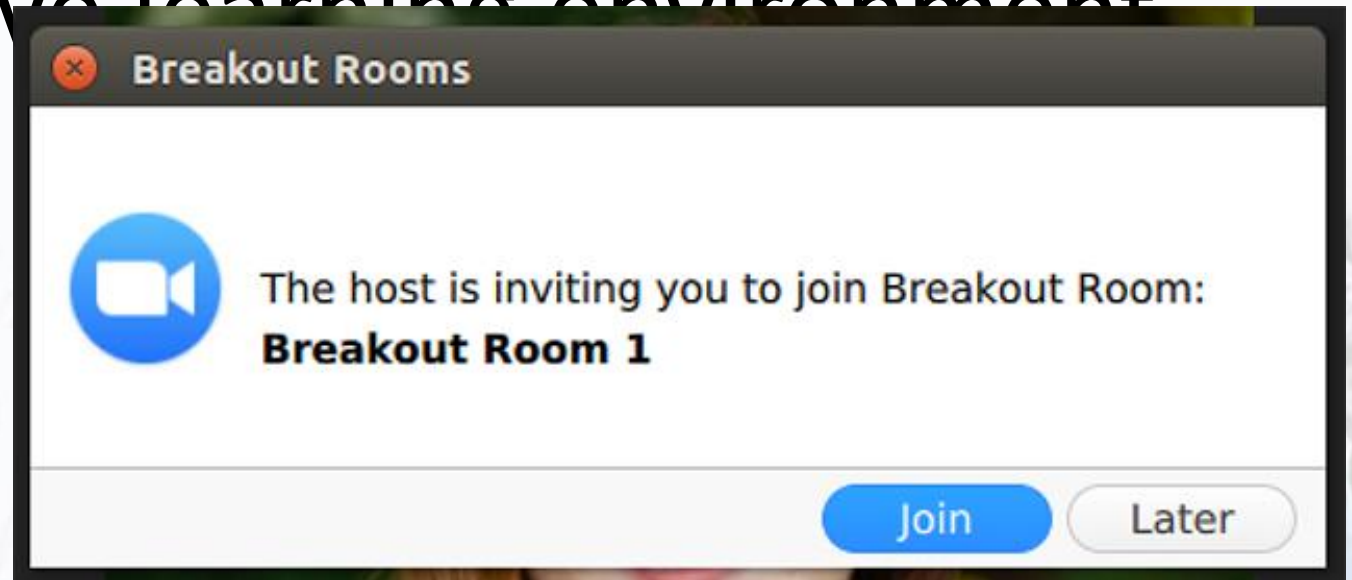

What is a 'normal' positive learning environment?

Instructions:

1. Read the question in the grey box at the top of the slide.
2. Work in breakout rooms to answer the question.
3. Take turns to provide an answer
4. Try and make a different contribution from the previous response to ensure the creation of new ideas or solutions.
5. After completing as many turns as possible, invite one participant to act as reporter to share top 3 response/s.
6. Type them out and drop them in the chat box when you get back to the main lobby

- Introduce yourself and your school.
- What does a positive learning environment mean to you?

After 3 minutes you

Physical Environment

- Classroom Layout
- Learning Supports
- Classroom Displays
- Student Ownership

Emotional Environment

- Negotiated Expectations
- Knowing your Students
- Rules and Routines
- Consistency and Fairness
- Respect
- Feedback

STUDENT BEHAVIOUR

Bandura (1977), Piaget (1976), Duchesne, McMaugh, Bochner, & Krause (2013), Bloom (1956), Gagne (1998)

So, what is a 'positive learning environment' online?

Do we replicate the research or do we find a new way?

Types of Online Learning

	Asynchronous Learning	Synchronous learning
Definition	Self-paced, self-directed learning virtually.	Real-time learning using classroom style elements virtually.
Characteristics	<ul style="list-style-type: none">• Flexible• Self-paced• Pre-determined by a moderator	<ul style="list-style-type: none">• Instant participation• Real-time• Facilitated by a facilitator
Benefits	<ul style="list-style-type: none">• Individual pacing as learners decide when and how to learn• Flexible schedule as learners direct their own learning	<ul style="list-style-type: none">• Real-time collaboration and communication as learners from different places interact virtually• Immediate sense of achievement as learners receive and give feedback instantly
Examples	<ul style="list-style-type: none">• Online surveys/polls• Website links, blogs• Discussion forums/boards	<ul style="list-style-type: none">• Audio/Web conferencing• Online chat/instant messaging• Online document-editing

So, what is a 'positive learning environment' online?

What does research say?

<https://www.tes.com/magazine/article/coronavirus-how-maximise-distance-learning>

“Based on UK evidence, there is not a lot to go on.”

Stephen Fraser, deputy chief executive of the Education Endowment Foundation.

Education
Endowment
Foundation

Reports:
2nd April
22nd April

Distance Learning Rapid Evidence Assessment

The Education Endowment Foundation is led a project, supported by their global partners, to produce a free and accessible evidence-based report for school leaders and teachers on effective distance and online learning approaches.

The report is based on a rapid review of the evidence from existing systematic reviews and meta-analyses on effective distance learning and online learning approaches and summarise information on practices used worldwide to support and improve learning for students who are not able to attend classrooms.

Key findings and implications

1. Teaching quality is more important than how lessons are delivered

Pupils can learn through remote teaching.

3. Peer interactions can provide motivation and improve learning outcomes

Ensuring that remote learning is more engaging and interactive ("sync") can improve outcomes. Multiple reviews highlight the importance of peer interaction during remote learning, as a way to motivate pupils and improve outcomes.

For example, across and for

4. Supporting pupils to work independently can improve learning outcomes

The value of learning

Pupils learning at home will often need to work independently. Multiple reviews identify the value of strategies that help pupils work independently with success.

For example, prompting pupils to reflect on their work or to consider the strategies they will use if they get stuck have been highlighted as valuable.

Wider evidence related to metacognition and self-regulation suggests that disadvantaged pupils are likely to particularly benefit from explicit support to help them work independently, for example, by providing checklists or daily plans.

The EEF report also says that the quality of remote teaching is more important than how lessons are delivered.

This means that livestreaming lessons is not necessarily more effective than sharing prerecorded videos, and vice versa.

The report adds: "What matters most is whether the explanation builds clearly on pupils' prior learning or how pupils' understanding is subsequently assessed."

What does research say?

<https://www.tes.com/magazine/article/coronavirus-how-maximise-distance-learning>

“In this case, often it [will have likely been] a matter of finding a pragmatic solution to a problem that can be implemented immediately rather than an elegant, scaleable and pedagogically sophisticated solution.”

Keith Heggart, University of Technology Sydney

So, where do we go from here?

LeapTO
LEARNING ENRICHED

Information overload V. practical help

What does research say?

“We did not draw conclusions about the “most effective” techniques. We have advocated for a greater embrace for pedagogies of engagement, and we have covered a lot of territory for how to think about that and accomplish it.”

Dianne Conrad and Jason Openo

http://cradall.org/sites/default/files/99Z_Conrad_Openo_2018-Assessment_Strategies_for_Online_Learning.pdf

“That means finding the right tool for the right job – and testing it comprehensively before deployment – has not been an option.”

Physical Environment

- Feedback

STUDENT BEHAVIOUR

Bandura (1977), Piaget (1976), Duchesne, McMaugh, Bochner, & Krause (2013), Bloom (1956), Gagne (1998)

What is a positive learning environment?

Classroom Layout	Learning Supports	Classroom Displays	Rules and Routines	Showing Respect
A classroom layout should support teaching and learning. There is no 1 ideal layout, but the position of the chairs and tables should be flexible according to the learning intention of the lesson.	Learning supports are resources, strategies and practices that enable all children to have equal opportunity for success.	A good display should not just brighten up the room, but also engage and inform students, and help with their learning.	Consistent rules and routines save valuable time in the classroom, and create consistency that enables learning.	Receiving respect from others helps us to feel safe, and more confident to express ourselves. Being respected by others models the behaviour and creates a safe space.
Student Ownership	Negotiated Expectations	Knowing your students	Consistency and Fairness	Giving Feedback
This is the amount of investment students have in their learning. This might be the topics they are learning, the methods or the places where learning happens. Shared goals, relevance , and self driven outcomes contribute to this.	Some research has suggested that teachers who give their students the opportunity to voice their opinions – either with choice of task, or in the language they use in behaviour management, can improve engagement and model good social skills for the future.	Teachers who are able to understand their students strengths and weaknesses through data, and through a personal connection, often get more engagement in their classroom.	Students are able to participate in learning more effectively when they have a clear understanding of classroom procedures and their importance. If students can name the expectations and receive consistent responses to their behaviour they are in better control of their actions.	John Hattie has found that feedback is one of the top 10 influences on student achievement. Feedback comes in many forms, but it has been noted that it is most effective when it is specific, timely and descriptive.

**It is time to think creatively about
what we already know...**

- 1. Classroom Displays**
- 2. Rules & Routines**
- 3. Knowing your students**
- 4. Student Ownership**

Classroom Displays

Word Walls

LeapEd Bright Ideas

Classrooms often have keywords displayed because the visual reminder is a great way to reinforce learning.

Create a word wall in an area of your house.

Use Picture Words

Make some visual words for display that will help them remember key vocabulary.

- 1 Decide which words you want to reinforce with your child.
- 2 Ask them to draw a self-explanatory picture word showing the meaning and the spelling.
- 3 Display the completed words.
- 4 Encourage them to quiz siblings or family members on the meaning of the word.

You can use your new display board to show key words or work your child is proud of.

1. Classroom Displays
2. Rules & Routines
3. Knowing your students
4. Student Ownership

Rules & Routines

Parents are reporting being overwhelmed

1. Consider the messaging
2. Broadcast channel like Telegram for key messages? (limit posts)
3. Create a single point of contact for work (Google Sites?)

Example Google Site

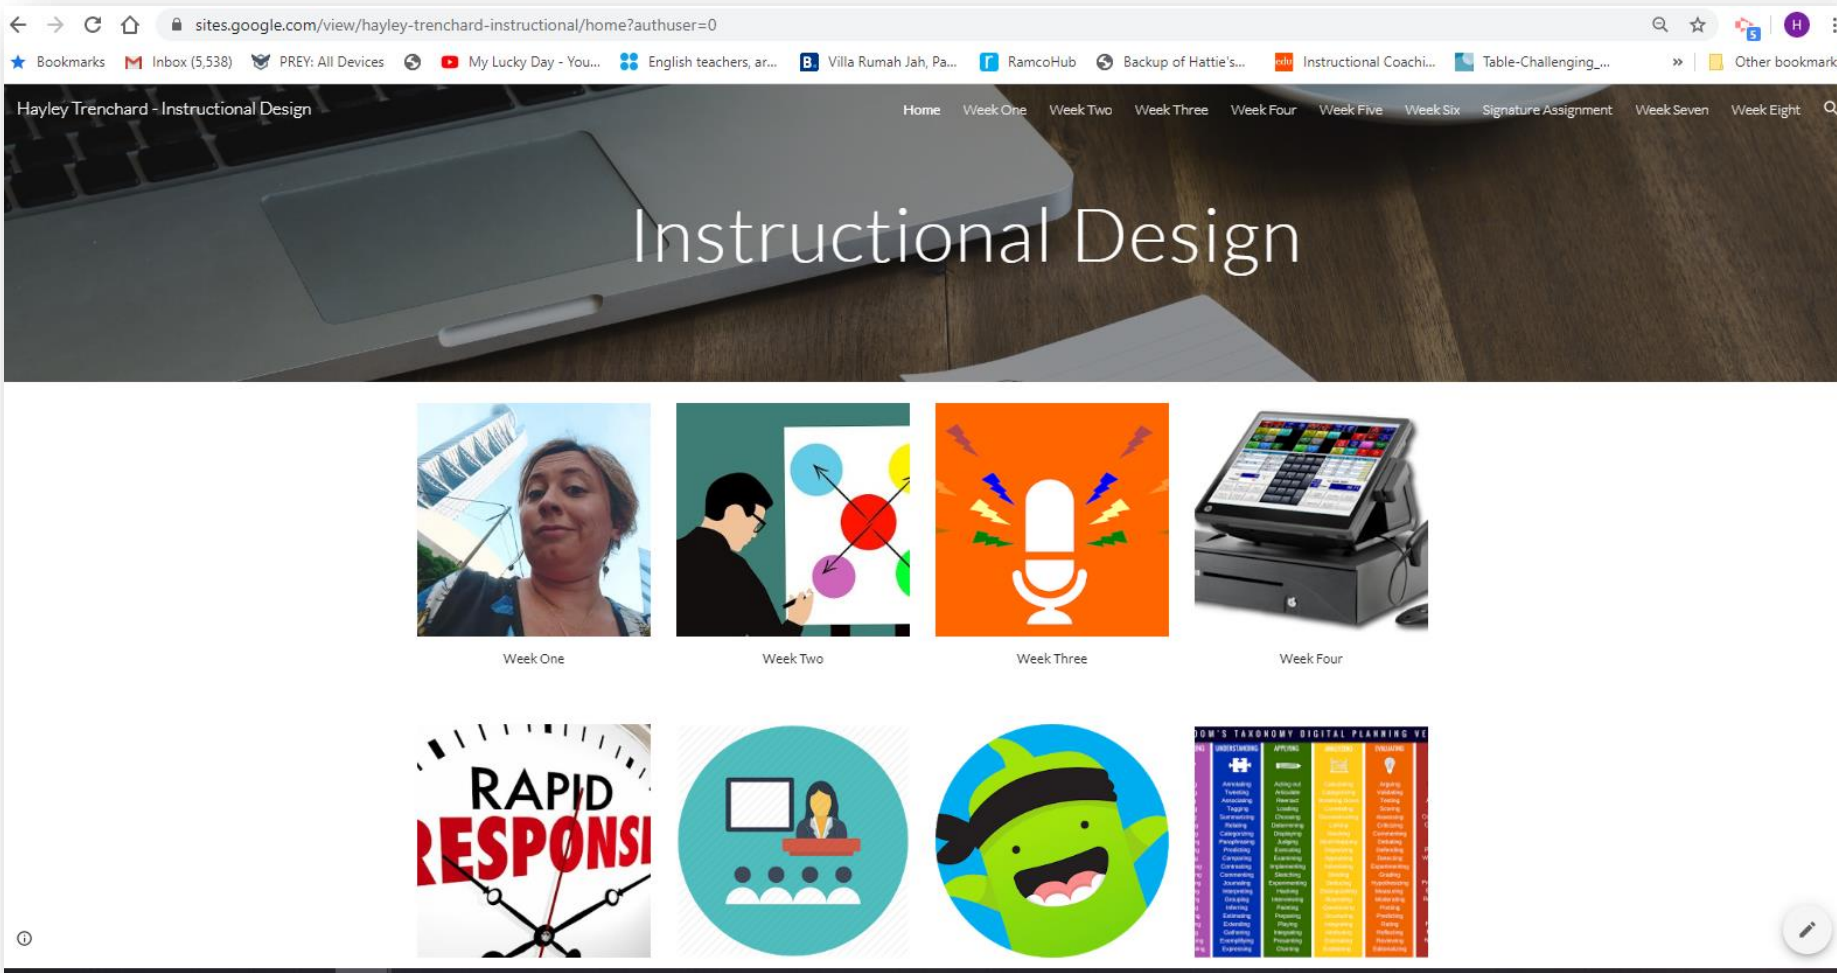

E Portfolio

“The e-portfolio permits learners to accumulate, build on, and reflect on the shape of their learning experience throughout their programs, making cogent observations and connections among learning experiences over a period of time”

- Students create their own E-Portfolio of work.
- Keep all their work in one place so they can see the progress

Single place for submission of work

E Portfolio

“The e-portfolio permits learners to accumulate, build on, and reflect on the shape of their learning experience throughout their programs, making cogent observations and connections among learning experiences over a period of time”

- Can you set up a WhatsApp chat only for submission of work?

1. Classroom Displays
2. Rules & Routines
3. Knowing your students
4. Student Ownership

Knowing your Students

Understanding your students situation

1. Survey Overload
2. Using & Sharing the Data
3. Knowing the situation can help teachers be empathetic

End of Day Check In

- Can you set up a WhatsApp chat only for a Check In?

Google form with emojis

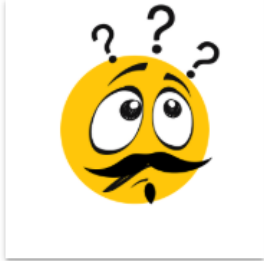

⋮

How are you feeling about your work today?

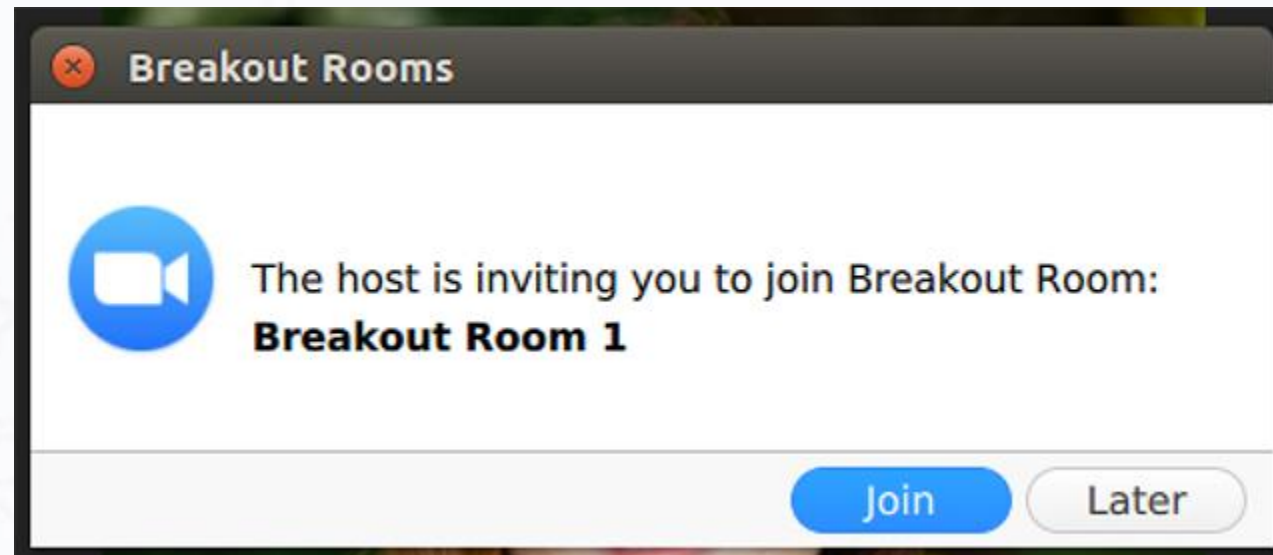

☐ Option 1

☐ Option 2

How can we think creatively about what we already know?

1. Classroom Displays
2. Rules & Routines
3. Knowing your students
4. Student Ownership

Student Ownership

This is the amount of investment students have in their learning. This might be the topics they are learning, the methods or the places where learning happens. Shared goals, **relevance**, and self driven outcomes contribute to this.

Relevance

Key Question:

**How can I make my topic
relevant to the students?**

Writing a letter

LeapEd Bright Ideas

Thank You Letter

- ✓ Research has suggested that sending messages of gratitude can increase the wellbeing of not only the receiver but also the sender. Taking some time to express our thanks can help keep our thoughts and feelings positive.
- ✓ Ask children to practice writing a letter 'off-line' and take a photo to send to the recipient.
- ✓ Lots of teachers are working hard at the moment, missing their students and worrying about their wellbeing. It might be a nice idea to encourage children to write them a letter telling them how they are doing, a note about their daily activities, etc.

To write a thank you letter:

- ✓ choose the recipient
- ✓ share the check list for a friendly letter with your child
- ✓ encourage them to write a first draft, and give them some feedback on the content
- ✓ write a final draft
- ✓ snap a photo and send it!

When giving feedback to children, remember to include the positive things!

Lots of teachers use '2 stars and a wish': 2 things the child did well, and one area for improvement.

**They have written a letter for a
reason.**

Weimar Germany - exam preparation

In your History GCSE, it is important that you not only have good subject knowledge, but have the skills to apply this knowledge to exam questions.

Part of History | Germany

Purpose	Why have the sources been produced? Was it to give information or is it meant to persuade you?
Author	Who wrote it? Are they a neutral, reliable source or will they be wanting to promote a particular way of thinking?
Tone	How has the source been written? Is it full of emotion or is it a neutral, balanced examination of facts?
Completeness	Is this a complete overview or focussed on a narrow part of the topic?
Historical context	What do you know about the topic outside of the source that you could use to support or challenge the usefulness of this source.

How useful are (sources) for a historian? (15 marks)

The second question will ask you to look at two different sources and a historian's interpretation. You will need to consider how the sources could be of use to a historian looking at a particular topic. These are likely to be a mixture of primary and secondary sources.

LeapEd
LEARNING ENRICHED

LeapEd Bright Ideas
for Parents

✓ Parents can develop higher order thinking skills with their children in their daily conversations.
✓ With access to so much digital information, children need to learn how to critically evaluate what they read.
✓ Ask questions to help them to think critically.

Become Fake News Detectives

Encourage children to use their detective skills when they read something news on the internet or WhatsApp.
Some questions that you can ask:

Who wrote it?	When and where is it from?	Why was it created?	Is the report trying to persuade you to do something?
Does the report contain emotive language?	Does the report contain lots of opinions?	Is it a rumour or speculation?	Does the story make sense with other things you know?

After discussing these questions encourage children to decide how reliable do they think the report is?

Create a fitness routine

What skills are they learning?

- Researching indoor fitness activities
- Timing / Duration
- Fluency in Speaking & Listening

The poster features the LeapEd logo at the top left, a lightbulb icon at the top right, and a collection of colorful pencils and a sharpener. The title "LeapEd Bright Ideas" is written in a playful, orange font. Below the title, there is an illustration of a person in a blue shirt and red pants performing a yoga-like pose on a green mat. To the right of this illustration, two green checkmarks are followed by text: "Many celebrities are broadcasting stories or fitness videos to keep people entertained during this period. Joe Wicks has famously started broadcasting to over 500,000 people." and "Challenge your students to get creative and make some videos for their classmates." Below this, the heading "Fitness Workout" is written in a cursive font. The main body of the poster contains two large green speech bubbles. The left bubble says "Challenge students to make their own indoor fitness workout." and the right bubble says "What activities can be done at home to stay healthy? Challenge the students to make a short routine for everyone in the family or to share with their classmates." At the bottom, there is a section titled "Got an idea to contribute?" with an email address "enquiry@leapedservices.com", a website "www.leapedservices.com", a QR code, and social media links for Telegram and LinkedIn. The footer includes the text "Share if it works with us: #LeapEdBrightIdeas" and the slogan "because every child deserves a great future" in a red, handwritten-style font.

Create passphrase

The poster features the LeapEd logo at the top left, a lightbulb icon at the top right, and a pencil and eraser illustration on the right. In the center, two children are sitting on a green beanbag chair. Below them, the title 'Passphrases' is written. The main content is organized into a green box with yellow and orange sections. A smartphone on the right displays prompts for creating a passphrase. At the bottom, there is a QR code, social media links, and a motivational quote.

LeapEd
LEARNING ENRICHED

LeapEd Bright Ideas

Children are spending more screen time on their devices and we have to ensure they are aware of their digital safety.

One way is to encourage the use of a strong password or 'passphrase'.

Passphrases

- Passphrases cannot be guessed and are also difficult to crack when using software.
- For example, if we take the first letters of the passphrase 'I met my best friend at Starbucks Coffee Shop', it creates a password of **IMmbf@SCs**.
- This super strong password would take approximately 44 years to crack!
- Remind your students/children to create their own super strong password using a clever passphrase.

When you have created your new passphrase and password, you can test the strength of it using this link: <http://www.useapassphrase.com>

Remember, every online account you have should have a different passphrase. Change your passphrase from time to time, and don't reuse an old one.

Prompts for a passphrase include:

- When and where do you go to school?
- When and where do you buy your favourite food?
- What is the last line of your favourite song?

Can you think of other ways to improve your digital security?

because every child deserves a great future

An example:

I want my students to memorise the water cycle

I ask them to create a passphrase for the topic

1. They need to remember the key words
2. They need to remember the meaning of the key words
3. They need to make a sentence from them

Send out examples of the student's pass phrases and ask them to 'crack' the code. (they revise the topic)

My passphrase

- The water cycle

WC PRECT

Water Cycle Precipitation Rain Evaporation Condensation Transpiration

Relevance:

**They have used their knowledge
for a digital purpose**

LeapEd
LEARNING ENRICHED

LeapEd Bright Ideas

for Parents

- ✓ Parents sometimes worry about limiting children's screen time, and whilst some have relaxed their limitations, we can take opportunities to reduce it wherever possible.
- ✓ It is currently less possible to monitor what children are doing online, while parents juggle home and work life.
- ✓ A possible solution is asking children to review or talk about the things they have seen or read at the end of the day.

Movie Review

Select a 'kids-friendly' movie and prepare your child to make a presentation about the content at the end of the day.

Ask them to answer the following questions at the end:

- What was the movie about?
- How predictable/ unpredictable was the plot?
- Were there any characters that you liked or disliked? Why?
- Which were your favourite scenes? Why?
- What was the theme/ main message?
- If you could rewrite the ending, what would you change?

Choose a time of day for the family to gather to hear each other's 'reviews' of the day. Parents can join in and share with their children what they have done.

Public Service Announcements (PSA)

A PSA is a short announcement that educates the general public about an issue.

- ✓ Give your students a chance to create their own PSA.
- ✓ This will help you assess their understanding of the issues, and allows for some offline project work.
- ✓ They could create a message about the importance of social distancing or give top tips about how to manage anxiety.
- ✓ Provide the students with the Criteria for Success, and let them get creative!

PSA Criteria for Success

In a good PSA:

- ✓ We learn about an issue using facts or statistics
- ✓ It changes our attitudes by using emotion or stories
- ✓ It persuades us to act in a different way

TOP TIP: By giving students a choice of what topic they research you are including easy differentiation into your remote classroom.

- 01 Send students a good example of a PSA or ask them to identify them on the TV or radio.
- 02 Ask students to brainstorm which issue they are passionate about.
- 03 Give students some time to research and plan.
- 04 You can ask them to send them their initial ideas so you can give feedback using the criteria for success.
- 03 Students create and, if possible, record their PSA at home.
- 04 Ask the students to watch and assess each other's work using the criteria for success.

💬 1,185 people are talking about this

boredpanda.com

2 tweets that summarise my thinking:

Dear Parents,

Don't stress about schoolwork. In September, I will get your children back on track. I am a teacher and that's my superpower. What I can't fix is social-emotional trauma that prevents the brain from learning. So right now, I just need you to share your calm, share your strength, and share your laughter with your children. No kids are ahead. No kids are behind. Your children are exactly where they need to be.

With love,
All the teachers on planet Earth

We need to engage parents with practical ways to ensure that learning continues.

This message is unhelpful.

Stuart Lock
@StuartLock

I am now assuming the earliest we will have schools looking anything like they used to (30ish children/ class, inc those with vulnerable relatives and all staff back) is well over a yr.

We need v long-term planning.

When schools "reopen" in May, June or Sept it won't be same.

18:22 · 18 Apr 20 · [Twitter for iPhone](#)

Whatever strategies we advocate for now must be part of a longer term plan.

For example: advocating for project based learning as part of a longer term development.

Therefore:

The strategies that we offer must be in line with our educational philosophy we want long term.

Specifically:

1. Excellent pedagogical practice – AFL, Feedback, Emotional Environment
2. Safe atmosphere to celebrate success
3. Cycle of Inquiry & Action Research
4. Project Based Learning
5. Modelling not just telling
