

CHALLENGING IMPOSSIBILITIES

LeapEd's Stories
Submitted to Voluntary National Review 2021
United Nations Global Compact

The Trust Schools Programme (TSP) nurtures my love for education. The teachers went through the Teach Smart Module which introduces them to Learning Assessment.

If I have questions but I am afraid to ask, I can write it on a paper or post-it note and put it in a question box or a 'parking lot'. Our teachers also encourage us to use graphic organisers and group discussions to explore further on a topic and eliminate ambiguity.

This programme has helped me maximise my opportunities and talent in socialising and interacting with new people through various out-of-school activities such as RaSA (Trust Schools Network) and many more. We all gather and share our school's achievements and lessons learned.

Through the Students Voice Group (SVG), the ambassador of the school, I am one of those that get to participate in these programmes which encourages us to talk or present in front of an audience.

Many exciting things have happened in these 5 years with TSP, but each of those will always be memorable. It also gives me an exposure to the slice of life we will be going through once we finish school. By then, may the force be with me!
