

International Best Practice for a Malaysian Context

Our decade of working in the Malaysian system, coupled with our global team of consultants, ensure that all our services provide international best practice alongside a deep working knowledge of the local system.

We know the similarities and differences between approaches from around the world and can help schools navigate the cultural nuances of Child Protection and Safeguarding in Malaysia.

What people say about our training:

[I liked] the positive, enthusiastic nature of delivery and engagement.

Really good to learn about Malaysia-specific examples and laws – so many training sessions are not based on local context, so this was very useful.

This course gives me further confidence in LeapEd – already high from previous experience.

[I liked] the clear, detailed information with examples and real case studies

The presenter was very engaging and made content interesting and meaningful.

What we do:

Whole Staff Training and Capacity Building - face-to-face and online

Designated Safeguard Lead (DSL) Training

E Learning: Child Protection Legislation & Understanding Depression, Anxiety and Stress

Safeguarding for International School accreditation

Policy Writing & Review

Consultancy

Early Years - Post-16

All programmes available in English & Bahasa Melayu
